

FinFlow

by REDDYTEC and Creatio

FinFlow is one solution for managing all main processes in an IT company. It's a simple and user-friendly system for running projects, finance, HR and business development. Based on the low-code platform Creatio, it can be easily customized for specific needs.

PROJECT MANAGEMENT

Manage both T&M and Fixed-price projects, distribute resources without conflicts between projects, create and control tasks in the system or integrate them from Jira.

FINANCIAL MANAGEMENT

Generate and send customized invoices based on your standards, calculate employee salaries, prepare financial reports and control expenses.

HR AND BIZDEV

Create detailed team profiles, use ready-made onboarding processes, keep calendars for vacation and events, maintain your contacts database according to marketing and sales tasks.

Why you need FinFlow:

Simple and fast process of management of all key processes

All in one place: all information and processes

Possibility of doing additional low-coding for own projects

You will get additionally:

- A No-code CRM system with the possibility of adding new modules necessary for you.

- Training and support from the Company's experts
